Spruce Wash Summary

- Flood risk is still very real (JE Fuller updated model)
- Bond funded projects will reduce the immediate flood risk while also reducing the footprint of the eventual FEMA Special Flood Hazard Area (i.e. FEMA floodplains)
- Drainage improvements will reduce the risk to life and safety while also reducing the long-term risk of properties being affected by a FEMA floodplain designation

First Phase of Construction

- Grandview Utilities
- Starting construction!
- Similar to Coconino Estates
