

Museum Fire Flood Projects

January 20, 2023

Welcome to the City of Flagstaff's Museum Fire Flood Projects eNews. Please email info@museumfloodprojects.com with any questions. These eNews will be released regularly to provide updates on all the City's Museum Fire Flood Projects.

BACKGROUND

On July 21, 2019, the Museum Fire broke out in the Dry Lake Hills area just north of Flagstaff within the Coconino National Forest. The fire ultimately charred 1,961 acres, including a significant portion of the Spruce Wash Watershed. Flood modeling subsequently showed potential flood risk to neighborhoods in Coconino County and the City of Flagstaff. Both the City of Flagstaff and Coconino County Flood Control District immediately took extensive measures and precautions to mitigate damage from flood events.

Throughout the summer of 2021, unprecedented rain events impacted the Museum Fire burn scar and caused multiple rounds of flash flooding in Flagstaff neighborhoods. The City of Flagstaff continues to collaborate with both the public and private partners to lessen the impact of flooding in the affected Flagstaff neighborhoods.

MUSEUM FLOOD AREA COUNCIL UPDATE

Tune in on Tuesday, January 24, for a Museum flood area update during the Flagstaff City Council Meeting. This update will include information on mitigation efforts and projects within the area. For more information or to participate in the meeting virtually, visit <https://www.flagstaff.az.gov/1461/Streaming-City-Council-Meetings>.

Can't make the meeting? All Museum flood area updates to the City Council are recorded and added to museumfloodprojects.com for later viewing.
