

Museum Fire Flood Projects

June 23, 2022

Welcome to the City of Flagstaff's Museum Fire Flood Projects eNews. Please email info@museumfloodprojects.com with any questions. These eNews will be released regularly to provide updates on all the City's Museum Fire Flood Projects.

BACKGROUND

On July 21, 2019, the Museum Fire broke out in the Dry Lake Hills area just north of Flagstaff within the Coconino National Forest. The fire ultimately charred 1,961 acres, including a significant portion of the Spruce Wash Watershed. Flood modeling subsequently showed potential flood risk to neighborhoods in Coconino County and the City of Flagstaff. Both the City of Flagstaff and Coconino County Flood Control District immediately took extensive measures and precautions to mitigate damage from flood events.

Throughout the summer of 2021, unprecedented rain events impacted the Museum Fire burn scar and caused multiple rounds of flash flooding in Flagstaff neighborhoods. The City of Flagstaff continues to collaborate with both the public and private partners to lessen the impact of flooding in the affected Flagstaff neighborhoods.

SANDBAG EFFORTS ENDING WITH ONCOMING MONSOON SEASON

Two services provided by the City of Flagstaff related to sandbagging will soon be ending. The pallets of sandbags and dumpsters for cinders and empty sandbags that are currently located throughout the Grandview and Sunnyside neighborhoods will be removed prior to July 1. The exact date of removal of the pallets and dumpsters is weather-dependent, so residents are encouraged to utilize any sandbagging materials they may need as soon as possible.

The Museum Fire flood area service request line will also stop taking calls on Friday, July 1. Prior to this date, residents who are unable to make necessary repairs to their emergency sandbag mitigation due to being elderly or having a disability should call [928-213-2102](tel:928-213-2102) to request assistance. Calls will be answered Monday through Friday from 8 a.m. to 4 p.m. Resources are limited, and crews will address as many properties as time and resources allow. If you need assistance, please call the service request line as soon as possible and before July 1.

NEIGHBORHOOD BULLETIN BOARDS

The City of Flagstaff is working to place bulletin boards throughout neighborhoods impacted by Museum Fire flooding. Resources, such as newsletters and news releases, can then be posted on these bulletin boards so that they can be read by residents who may not have access to online materials. We need your help in deciding where to place the bulletin boards. If you have a suggestion for a good location for a bulletin board (perhaps the location sees heavy foot traffic or is near a widely used community resource), please email info@museumfloodprojects.com with your suggested location.

Example of what the neighborhood bulletin boards will look like

ESFUERZOS DE SACOS DE ARENA QUE TERMINAN CON LA PRÓXIMA TEMPORADA DE MONZONES

Pronto finalizarán dos servicios proporcionados por la ciudad de Flagstaff relacionados con la colocación de sacos de arena. Las tarimas de sacos de arena y contenedores para cenizas y sacos de arena vacíos que actualmente se encuentran en los vecindarios de Grandview y Sunnyside se retirarán antes del 1 de julio. La fecha exacta de retiro de las tarimas y contenedores depende del clima, por lo que se recomienda a los residentes que utilicen cualquier material de sacos de arena que puedan necesitar tan pronto como sea posible.

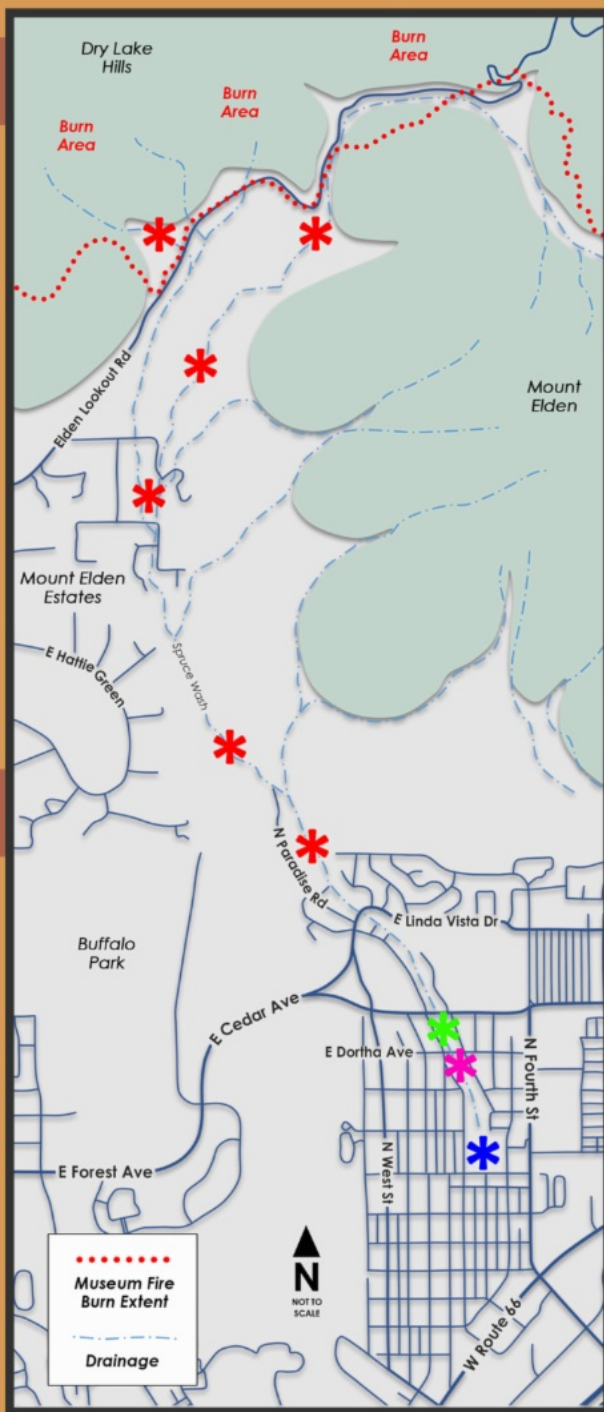

La línea de solicitud de servicio del área de inundaciones de Museum Fire también dejará de recibir llamadas el viernes 1 de julio. Antes de esta fecha, los residentes que no puedan hacer las reparaciones necesarias a su mitigación de emergencia con bolsas de arena debido a que son ancianos o tienen una discapacidad deben llamar al [928-213 -2102](tel:928-213-2102) para solicitar asistencia. Las llamadas se atenderán de lunes a viernes de 8 a. m. a 4 p. m. Los recursos son limitados y las cuadrillas abordarán tantas propiedades como el tiempo y los recursos lo permitan. Si necesita ayuda, llame a la línea de solicitud de servicio lo antes posible y antes del 1 de julio.

TABLONES DE ANUNCIOS DE BARRIO

La ciudad de Flagstaff está trabajando para colocar tableros de anuncios en los vecindarios afectados por las inundaciones del Museum Fire. Los recursos, como boletines y comunicados de prensa, se pueden publicar en estos tableros de anuncios para que los puedan leer los residentes que no tengan acceso a los materiales en línea. Necesitamos su ayuda para decidir dónde colocar los tableros de anuncios. Si tiene una sugerencia para una buena ubicación para un tablón de anuncios (tal vez la ubicación tenga mucho tráfico peatonal o esté cerca de un recurso comunitario ampliamente utilizado), envíe un correo electrónico a info@museumfloodprojects.com con su ubicación sugerida.

Ejemplo de cómo quedarán los tableros de anuncios del barrio
